# **TECH STACK:**

- **FRONT END**

- HTML
- CSS
- Javascript
- Bootstrap

- **DATABASE**

- Mongo DB

- **BACK END**

- Node js
- Express js

# FEATURES:

## Basic Features:

- Users can sign up and log in with their college IDs, with separate accounts for students and canteen owners.
- They can easily browse the canteen's menu, complete with descriptions and prices for all food items.
- Ordering food is a breeze, with options to customize items according to personal preferences.
- Payments can be made conveniently using credit/debit cards, net banking, or digital wallets.
- Orders can be tracked in real-time, and users receive updates on their order status, pickup time, and location.

## Advanced Features:

- Users have the opportunity to share feedback and rate their dining experiences, helping the canteen improve its services.
- Pre-ordering meals is available, ensuring users get their food at their preferred times and avoiding long queues.
